Boxcryptor for Teams

Make The Protection of Data in the Cloud Your Priority

Boxcryptor Company and Boxcryptor Enterprise are the perfect software packages that make the use of cloud storage safe.

Enjoy all the benefits of a cloud service, while resting assured that internal, as well as external compliance regulations are met.

Our end-to-end encryption software enables you to have full control of your company's cloud storage.

No one but you and the members of your team (your employees) can access your data – thanks to our applied zero knowledge principle not even we are able to access this data, even if we wanted to.

Protect yourself, your employees, your customers and your partners from the painful consequences of data leakage.

Emphasize data protection and the protection of privacy as a top priority and protect your company from harm, reliably.

Webinar

Every month we offer a For Teams Webinar, in which we provide a detailed overview and explanation on the features of Boxcryptor for Teams.

Our webinar demonstrates in detail how...

- the Boxcryptor administrator web app is used and how to define policies (for the use of Boxcryptor).
- users are managed most efficiently (Creation of groups, Add/Remove users, etc.).
- to set up the folder structure for a simple, yet effective use of encryption.
- the Boxcryptor settings are customized.
- new users are created.
- the Master Key is created and applied.

Find out when our next For Teams Webinar takes place and register for participation:
